

Image at the left shows the proposed location of noise barrier walls.

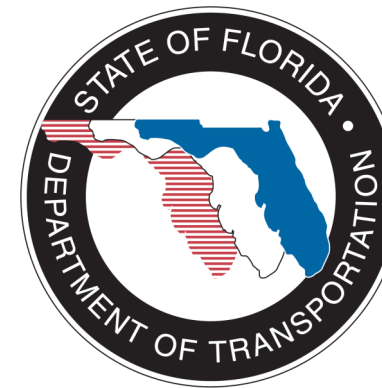

Project Facts:

- Start Date: May 2013
- Completion: Summer 2016
- Length: 3 miles
- Cost: \$95 million
- Contractor: Superior Construction
- Designer: Arcadis US

Construction on this phase of State Road 9B from US 1 to I-95 was accelerated by a public-private partnership between the Florida Department of Transportation and Infrastructure Development Partners. Infrastructure Development Partners is a collaboration between Deutsche Bank and Superior Construction.

A public-private partnership is a contract between a public agency and a private entity for the benefit of the general public. In the case of State Road 9B from US 1 to I-95, the partnership allows the project to move forward by providing immediate funding for construction. Construction of State Road 9B Phase 2 is the first public-private partnership in FDOT District Two (the northeast Florida area).

Public participation is solicited without regard to race, color, religion, sex, age, national origin, disability or family status.

State Road 9B

Phase 2

US 1 to I-95

Project Summary:

Phase 2 of the new State Road 9B extends the new roadway from US 1 south to I-95. State Road 9B, including this new extension between US 1 south and I-95, alleviates traffic congestion by improving access between Duval and St. Johns counties. Construction begins in May 2013 and is anticipated to be complete in Summer 2016. As with the first phase, this second phase is a limited access highway, similar to an interstate with restricted entry and exit points to help maintain traffic flow.
