

ABOUT THE PROJECT

The Florida Department of Transportation is scheduled to begin intersection and pedestrian safety improvements project at Atlantic Boulevard and 3rd Street in January. American Lighting and Signalization, Inc. was selected to complete the \$1.9 million improvements by spring 2022, weather and schedule permitting.

Milling, resurfacing and restriping approximately 900 feet of pavement through the intersection of Atlantic Boulevard (State Road 10) and 3rd Street (State Road A1A).

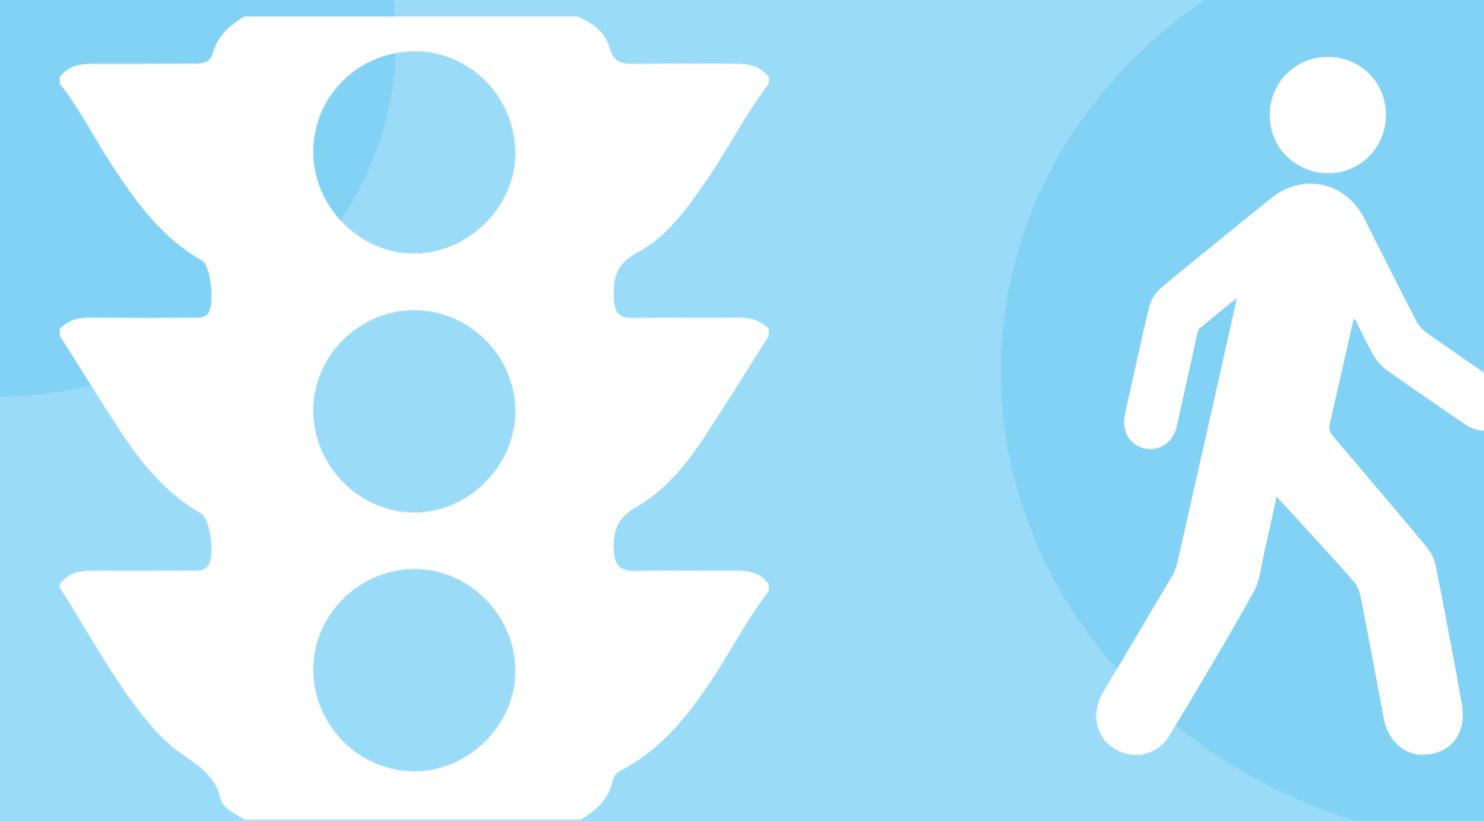

Lengthening the existing raised median on 3rd Street between Atlantic Boulevard and Lemon Street to eliminate the existing southbound 3rd Street to eastbound Lemon Street left turn movement.

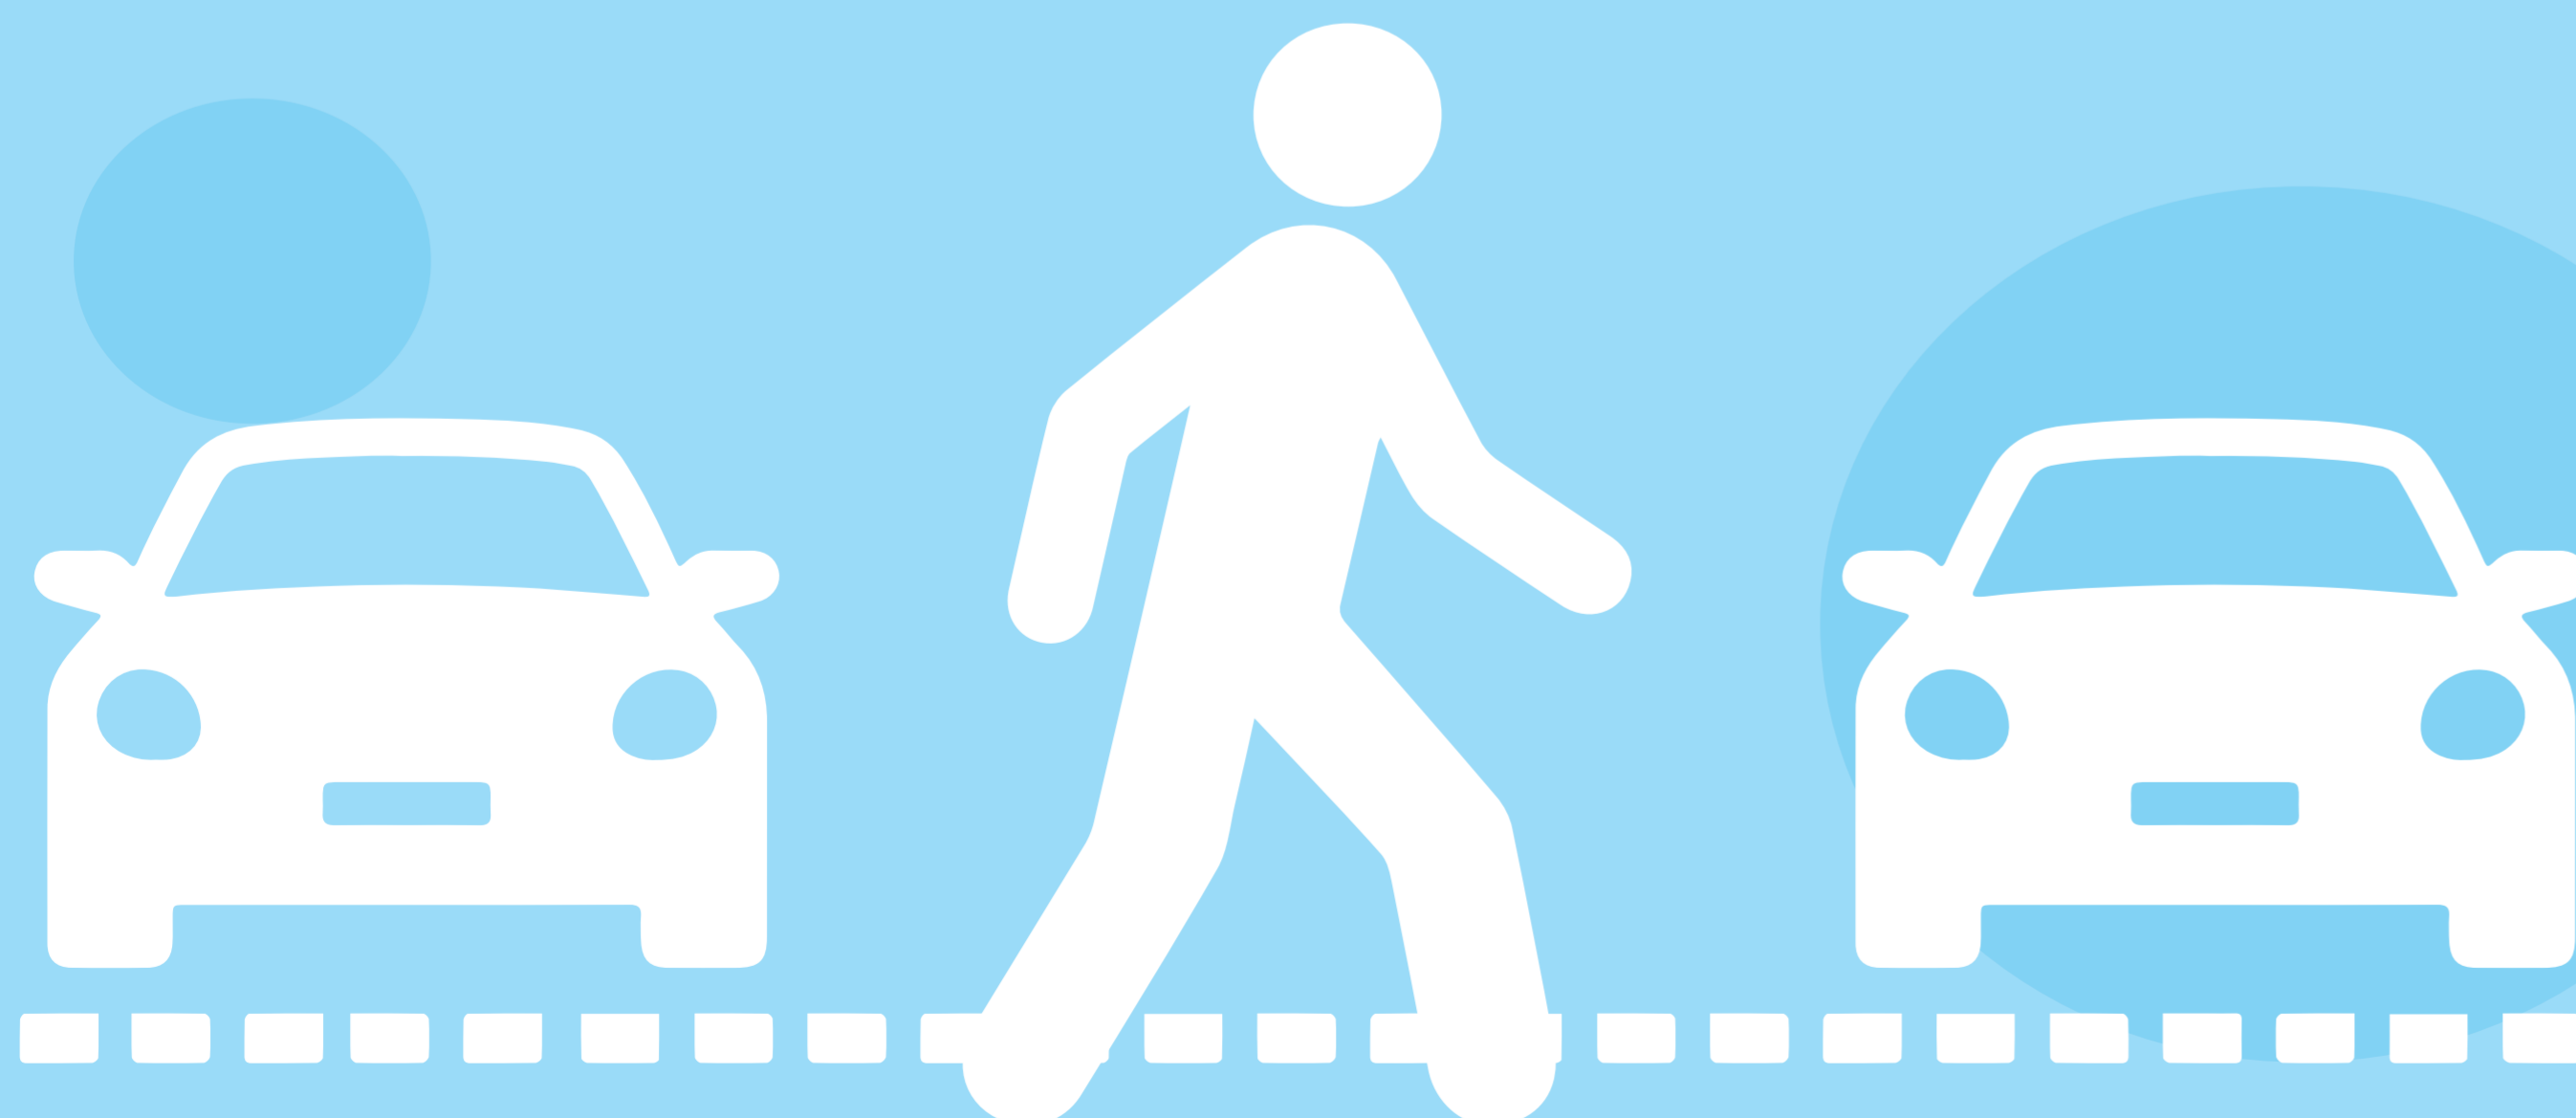

Marking the inside two lanes of northbound 3rd Street as left turn only and marking the outside lane with the option to turn right or proceed straight through the intersection.

Adding pedestrian lighting improvements to the northeast, southeast and southwest corners of the intersection.

Adding a raised lane divider to southbound 3rd Street to provide a crosswalk refuge point for pedestrians crossing 3rd Street.

Widening the right turn from eastbound Atlantic Boulevard to southbound 3rd Street to prevent semi-trucks and vehicles pulling trailers from encroaching on the sidewalk/pedestrian landing.

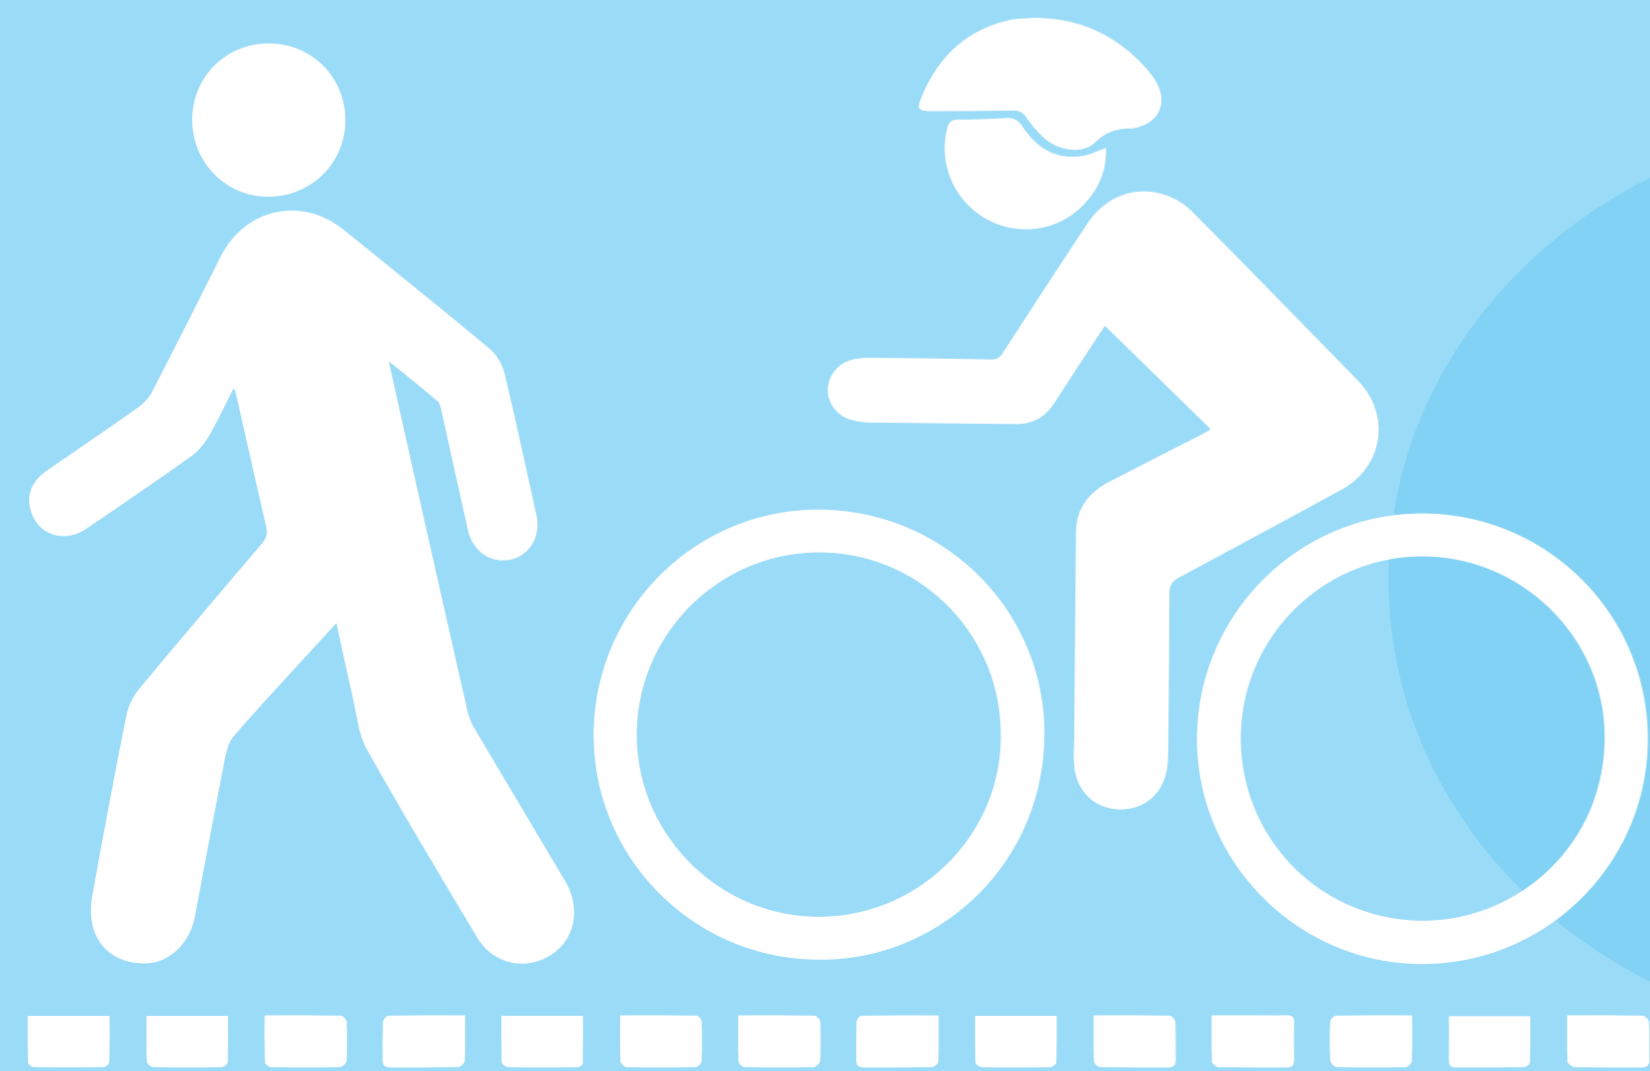

Installing Pedestrian Hybrid Beacons on 3rd Street on the south side of Bay Street and on 3rd St on the south side of 15th Avenue North.

Milling, resurfacing and restriping approximately 60 to 120 feet of pavement at each crosswalk location.

Providing crosswalk refuge points for pedestrians in the medians as well as bulb outs at the crosswalks to prevent vehicles from parking in the crosswalks.

Installing additional lighting and drainage at both crosswalk locations.
