

How Does SunPass Work?

Tolls will be collected using a fully automated system called SunPass. There will be no toll booths. The transponder, once attached to the inside of your front windshield, will be read by radio signals from toll gantries along the corridor. As you drive through the express lanes, the proper toll amount is deducted from your prepaid SunPass account.

Transponders can be purchased at your local CVS/Pharmacy, Walgreens, Publix, Amcscot, and all Turnpike service plazas and gas stations. For a complete list of retail locations, go to www.sunpass.com.

To activate your transponder, open a SunPass account online at www.sunpass.com or by calling 1-888-TOLL-FLA (1-888-865-5352). You can also activate your account by downloading the free iPhone/iPad app. The SunPass transponder will not work until you put a minimum of \$10 on your account with a credit or debit card. Prefer to pay with cash? You have that option at nearly 5,000 retail locations.

It is your responsibility to monitor the status of your prepaid account and ensure it has sufficient funds to cover all applicable tolls and other charges.

First Coast Expressway (State Road 23)

From I-95 in St. Johns County to Blanding Blvd. (SR 21) in Clay County

Public Information Meeting

December 10, 2015

Financial Project Numbers:
422938-2 & 422938-3

Hickory Grove Baptist Church
310 S. Oakridge Avenue
Green Cove Springs, FL 32043

Welcome

Tonight, FDOT is hosting an informal Open House, which means there is no presentation. We have displays and other project information available for you to view.

The updates on display tonight show changes to the US 17 interchange and other modifications in the Green Cove Springs area.

Please note this section of the First Coast Expressway is still in the design phase.

Agenda

Open House
3:30-6:30p.m.

Feel free to use this time to discuss the project with FDOT staff.

Project Contact

Project Overview

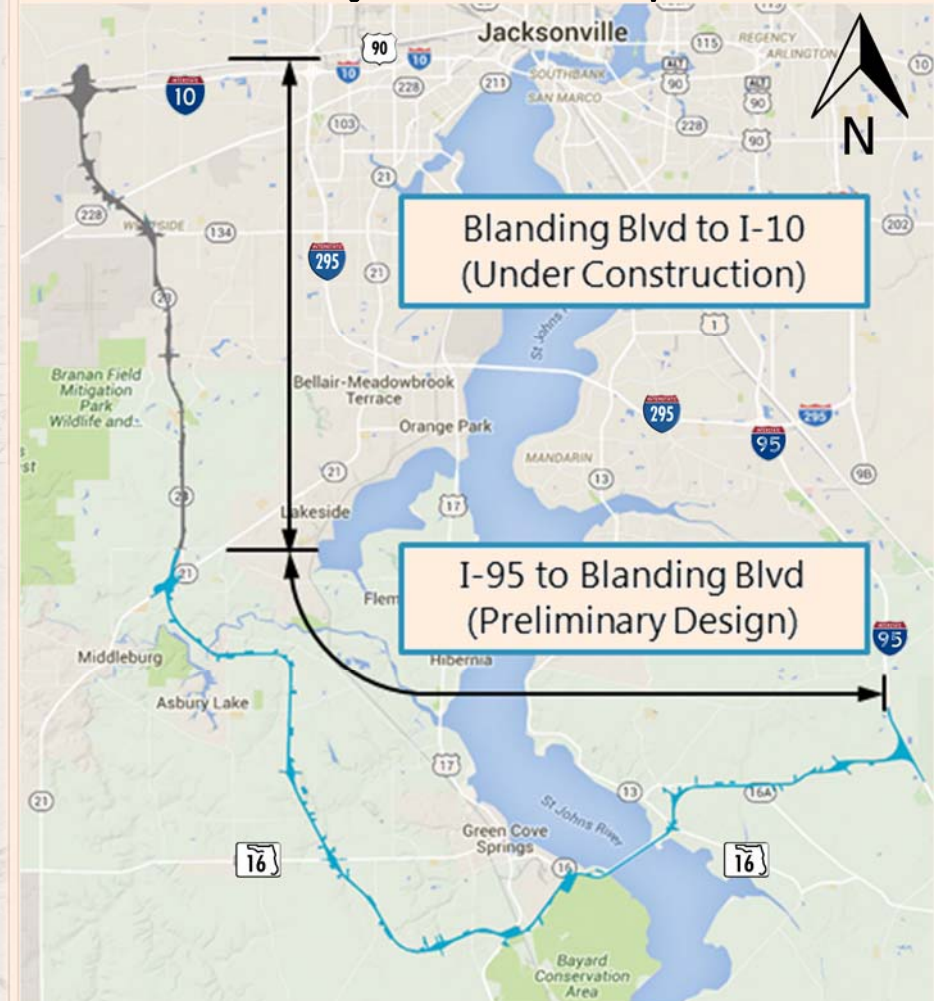

The First Coast Expressway is a new multi-lane limited access toll facility that will eventually connect I-95 in northern St. Johns County to I-10 in western Duval County. The northern section from Blanding Boulevard (SR 21) in Clay County to I-10 in Duval County is currently under construction and is scheduled for completion in 2017. Construction is also underway on the First Coast Expressway extension from I-10 to Beaver Street (US 90). Estimated completion for the extension section is Fall 2018.

Project Description

The project limits for the southern section of the First Coast Expressway are from I-95 in St. Johns County to Blanding Blvd (SR 21) in Clay County. This section is currently in the preliminary design phase. Proposed improvements include:

- A multi-lane divided expressway from I-95 to Blanding Blvd.
- A new bridge over the St. Johns River south of the existing Shands Bridge.
- Drainage ponds.
- Automated tolling facilities for electronically paid tolls (SunPass). (More information on back).

Project Location Map

WE WANT YOUR FEEDBACK!

FDOT remains committed to working with all project stakeholders. No final decisions will be made until we hear your comments. There are many ways to provide comments:

- 1) State your comments or ask questions during tonight's comment period.
- 2) Complete a comment form and drop it in the
