

****Traffic Advisory****

JACKSONVILLE, Fla. – Eastbound Beach Boulevard (U.S. 90) just east of Falcon Ridge is currently seeing an extended lane closure of the outside right lane due to a drainage pipe break, which has created a washout in the right-of-way adjacent to the travel lane.

Out of an abundance of caution, crews have closed the outside lane. The sidewalk at the location is expected to be closed for an extended period of time as crews make long-term repairs. Pedestrians are encouraged to use the sidewalk on the westbound side of Beach Boulevard as an alternate route.
