Subsequent Public Hearing

A previous public hearing was held on this project in June 2006. Since that time the Department has revisited the recommendation and is proposing the following changes.

The proposed improvements recommend widening the existing two lane roadway to a four lane divided roadway with a raised 22 foot grassed median, curb and gutter, bicycle lanes, a sidewalk on the westside of the roadway, a 12 foot multi-use path on the eastside and stormwater ponds. The Department is also recommending safety improvements on CR 309. The proposed improvements will require right of way.
