The Florida Department of Transportation (FDOT) is conducting a Project Development & Environment (PD&E) Study for proposed widening and reconstruction of US 17 from Collins Road in Duval County to South of Wells Road Intersection in Clay County. Additional improvements include ramp and intersection improvements at the US 17 and the I-295 off ramps, Eldridge Avenue, Old Orange Park Road, and Wells Road.

Traffic operations within the project study area show excessive delay and heavy queuing at the intersections along US 17 during peak hours as well as at the on and off-ramps to I-295. With expectations of continued traffic operations issues, this PD&E study is investigating alternatives to meet capacity needs, intersection operations and safety within the study area.

Public participation is sought without regard to race, color, sex, age, religion, national origin, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translations services (free of charge) should contact Eric Shimer at the number provided at least 7 days before the meeting.

The environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being, or have been, carried out by the Florida Department of Transportation (FDOT) pursuant to 23 U.S.C. §327 and a Memorandum of Understanding dated December 14, 2016 and executed by the Federal Highway Administration and FDOT.
