

ABOUT THE PROJECT

The FDOT will begin construction in fall 2023 on an interchange improvement project at Southside Boulevard at Deerwood Park Boulevard. This \$29 million project should be completed by summer 2025, barring unforeseen conditions such as bad weather.

This project includes:

- Milling and resurfacing.
- Upgrades to drainage, sidewalks, crosswalks, new traffic signals and lighting.
- Enhancing traffic flow at the intersection by adding travel lanes and implementing new movements for left and right turns.
- A companion project includes milling and resurfacing Southside Boulevard from Butler Boulevard (State Road 202) to Philips Highway.
