The Florida Department of Transportation (FDOT) is considering changes to University Boulevard (State Road 109) as part of a planned resurfacing project from San Jose Boulevard (State Road 13) to I-95. FDOT proposes installation of a directional median opening with traffic separators at Chester Avenue to eliminate the left turn movement from Chester Avenue to westbound University Boulevard; installation of a 4-foot traffic separator from Chester Avenue to Powers Avenue to direct left turn movements to the signalized intersection at Powers Avenue; installation of a 4-foot traffic separator from west of Richard Street to east of Cagle Road to direct left turn movements to the signal at Richard Street; and installation of a left turn directional median at Cagle Road to eliminate the northbound left turn movement at this intersection. These changes are intended to reduce the high incidence of crashes in the project area.

The meeting will take place virtually and in-person at the FDOT Urban Office Training Center at 2198 Edison Avenue, Jacksonville, FL 32204. FDOT staff and consultants will be available from 4 to 6 p.m. to answer questions and accept comments. A formal presentation and public comment period will begin at 6 p.m.
