Both virtual and in-person participants will be given equal opportunity to learn more about the intersection improvements, ask questions and view renderings of the project.

Intersection Improvements

1. Construct a Hybrid Offset-T intersection
 - * Geometric realignment of CR 240 at the intersection to improve the existing skewed angle approach to 90 degrees
2. Install new roadway lighting at the intersection
3. Install new signing and pavement markings
 - * Install ground mounted “STOP” signs with flashing red beacons on CR 240 approaches
 - * Install “STOP AHEAD” warning signs on CR 240 approaches
 - * Install “WRONG WAY” signage and directional arrow pavement markings
4. Enhance the existing overhead flashing beacon
 - * Retain the existing yellow flashing overhead beacons for SR 247 approaches and add retroreflective backplates to the signal heads
 - * Remove red flashing overhead beacons for CR 240 approaches due to new alignment of CR 240

Construction Start: Spring 2024 • Estimated Completion: Fall 2024
