Project Location

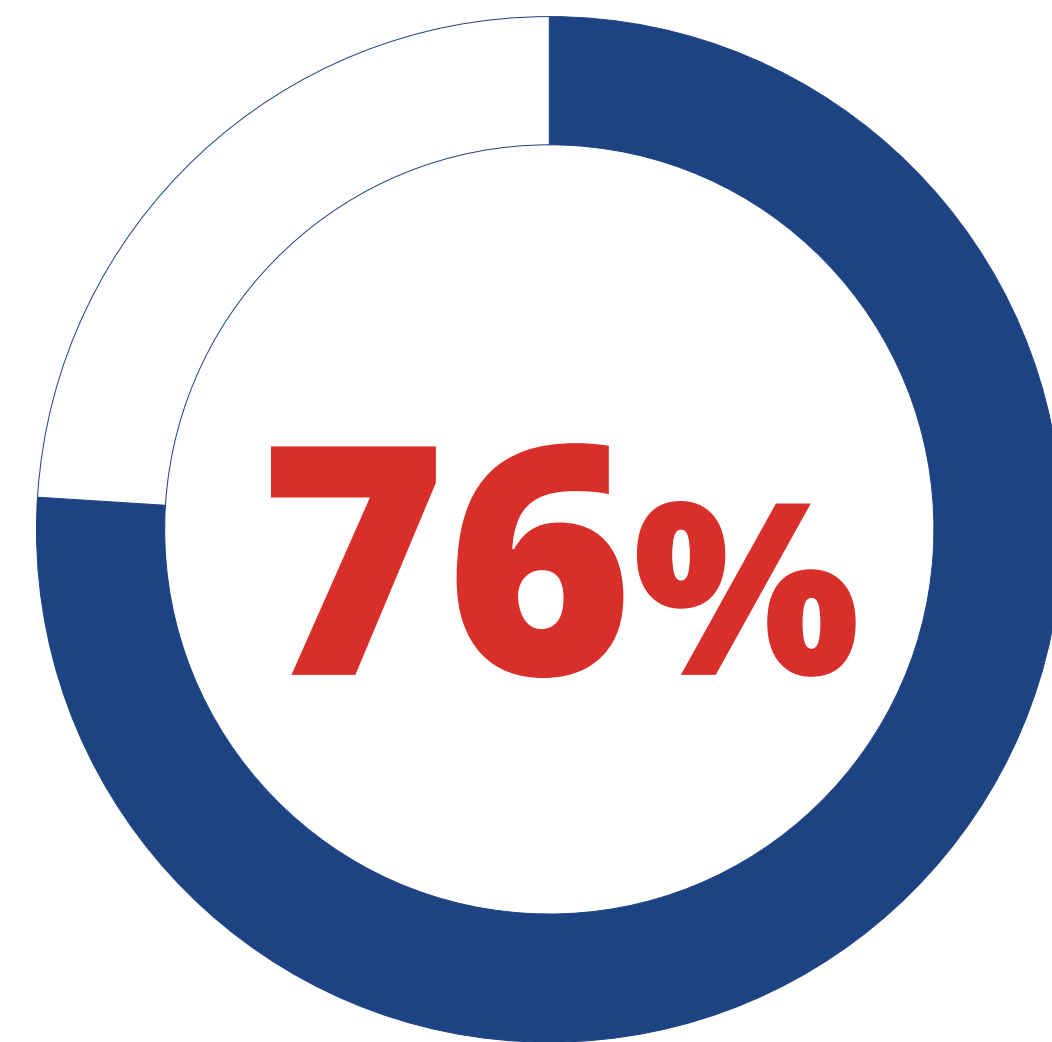

Safety

Fewer fatalities

Fewer injuries

**Fewer pedestrian/
bicycle crashes**

Time

Increases traffic capacity at intersections by **30% to 50%**

Money

No cost for yearly maintenance and operates during power outages

What is Access Management

Access management is the careful planning of the location, design, and type of access to properties, businesses, and homes. This includes guidelines for median and driveway openings. Access Management serves to promote safe and efficient movement of people and goods by reducing traffic conflicts.

Question about Access Management?

If you have concerns about proposed access changes that may affect your property or business, you may appeal to the Access Management Review Committee and request an opportunity to present your concerns.

Access Management Review Committee
