ACCESS MANAGEMENT

What is Access Management?

Access management is the careful planning of the location, design, and type of access to properties, businesses, and homes. This also includes median openings and driveway entrances. The goal of access management is to promote safe and efficient movement of people and goods by reducing potential conflicts on the roadway. Access management improves safety by reducing the number of potential conflict points for users of the transportation network, thereby lowering the risk of crashes.

Median Openings

Interchanges

Driveway Openings

Traffic Signals

Access Management Review Committee

If you have concerns about access that affect your property or business, you can appeal to the Access Management Review Committee and request an opportunity to present your concerns in person or in writing by contacting:

Jeffrey Scott, PE
